

Where should I place the recycling and trash bins for collection?

Republic recommends residents follow the following placement guidelines.

- Always place the bins adjacent to the curb, not on a sidewalk or driveway.
- Place the bins with a minimum of three feet between them so the collection truck arms may reach, lift and replace with ease.
- Bins may be placed the night prior to collection or any time before 7 a.m. the day of collection.
- Bins should be returned out of sight after collection.

Option 1 - Place bins on the same side of driveway.

Option 2 - Place bins on each side of driveway.
